Brisbane, Australia · 0430 002 237 · jessyuxer@gmail.com · jessyux.com · linkedin.com/in/jessyux

SUMMARY

Brisbane-based product designer with hands-on product management experience. I design end-to-end across patient-facing flows and internal tools, prototype with AI assistance, test with users, and stay with the work after launch: sizing opportunities in BigQuery, writing PRDs, leading kickoffs, change management and measurement. I build Claude workflows that my product team uses day to day.

SELECTED IMPACT

- **19% reduction** in patient-initiated churn and an estimated **$13.7M/year** in revenue protected by redesigning the uMeds reorder and shipping experience (2025).
- **Usability up on every measured task** in the Circuit operations portal redesign (find-a-record 2.6 to 4.6 of 5), with ~150 accessibility issues surfaced against WCAG 2.2.
- **+180% sessions** on the momentLeader AI coaching app MVP, scoped with the Head of Product and a Product Manager.
- **AI workflows adopted by Montu's product team**: built and co-built Claude skills for the 5-phase product process and on-brand release decks.
- **'Goal Savings' shipped and live** in the Westpac Youth banking app, later recognised by WeMoney and Canstar.

EXPERIENCE

Montu (uMeds / Alternaleaf) | Health tech, Brisbane — *Oct 2024 - Current*

Product Designer — *Oct 2024 - Current*

- Lead end-to-end product design for uMeds ordering and fulfilment, from patient-facing ordering flows to internal tools for pharmacy partners and support staff.
- Redesigned the reorder and shipping experience with same-day, click & collect and scheduled delivery, cutting **patient-initiated churn 19%** and protecting an estimated **$13.7M a year**.
- Redesigned Circuit, the internal operations portal: research-led, **usability up on every measured task** (find-a-record 2.6 to 4.6 of 5), ~150 accessibility issues surfaced against WCAG 2.2, ~3 FTE (~6,000 hours/year) of capacity modelled as unlocked.
- Designed the uMeds AI chat support widget, working with AI conversation designers to build the patient support chat and reduce patient support call volumes.
- Introduced research rigour (heuristic reviews, task-based usability testing, VOC synthesis) to a team that previously shipped without it; all designs shipped to production meet strict TGA regulatory requirements, working with the legal team on patient-facing designs and context.
- Built and co-built Claude skills **adopted by Montu's product team**: a 5-phase product-process assistant (JPD, PRD and evaluation artefacts) and a 'What's New' skill for on-brand release decks.

Product Manager (added to design scope) — *Feb 2026 - Current*

- Own uMeds ordering and fulfilment opportunities across the 5-phase product process, from scoping and financial modelling to kickoff and evaluation with BigQuery-linked dashboards.
- Found in BigQuery that **~78% of stock-blocked same-day orders were silently rerouted** to distant pharmacies; aligned fulfilment, ops and pharmacy leads on a single-pharmacy pilot and sized a **~$1.2M a year (modelled)** opportunity.
- Wrote a boundaries-first PRD with a holdout and guardrails, built the replenishment tool inside Fulfilment's existing workflow, and ran the kickoff with backend and delivery.

UX/UI Design Lead | momentLeader — *Aug 2023 - Jan 2026*

- Led UX/UI for an AI professional development coaching app built around moments of reflection and backed by psychologists and therapeutic practice, helping people navigate difficult situations at work.
- Partnered with the Head of Product and a Product Manager to scope the MVP: ran UX audits and ideation workshops, then produced low, mid and high-fidelity wireframes.
- Evaluated MVP success through user surveys and engagement monitoring, with **sessions up 180%**.
- Upskilled staff in UX and UI principles and trained mentees to become self-sufficient product designers.

Product Designer | iDU Identification, Brisbane — *May 2023 - Oct 2024*

- Designed web, iOS, Android and SaaS experiences to WCAG 2.2, balancing accessibility with conversion goals.

- Partnered with product managers, engineers and the GTM team to take products from concept to launch, shaping direction, priorities and scope during planning.
- Led workshops and worked in cross-functional scrum teams to ship quickly without compromising quality, managing trade-offs and constraints.

UX/UI Designer | Conversion Kings, Brisbane *Mar 2023 - May 2023*

- Designed intuitive, on-brand interfaces to meet client conversion goals, grounded in user research, usability testing and data analysis.
- Partnered with developers, project managers, data analysts and CRO strategists to align design with project goals and timelines.

Enterprise Account Representative | Miro, Sydney *Feb 2022 - Mar 2023*

- Lead product designer for a Miro hackathon, incorporating game mechanics to boost engagement; ran user research, prototyped mid and hi-fi concepts and presented to stakeholders.
- Worked strictly within Miro's design system and WCAG guidelines, collaborating async with the EMEA delivery team.

Fullstack UX Designer | Raise The Fire, Remote *Aug 2021 - Feb 2023*

- UX/UI designer and researcher for a crypto start-up reimagining how influencers and fans interact; ran research, built wireframes and prototypes and iterated on user feedback.

Freelance UX Designer | Westpac (Contract), Remote *Feb 2021 - Mar 2021*

- Part of the team redesigning the Westpac Youth app; led persona and ideation workshops and created user artefacts (personas, journey maps, empathy maps, affinity maps).
- Prototyped and iterated to the Westpac design system; 'Goal Savings' shipped and is now live in the Westpac Youth app.

NSW Field Partner Manager | MYOB, Sydney *Aug 2016 - Dec 2020*

- Grew and managed client relationships across the full business cycle, translating complex concepts for technical and non-technical audiences from entry level to C-suite.

SKILLS & TOOLS

Design and research: UX/UI design · user research · usability testing · wireframing · rapid prototyping · AI-assisted prototyping · design systems · information architecture · user journeys · workshops · accessibility (WCAG 2.2) · conversion optimisation · A/B & MVT testing

Product: opportunity sizing · financial impact modelling · JPDs and PRDs · stakeholder alignment · engineering kickoffs · change management · post-launch evaluation (BigQuery dashboards)

Software: Figma · Maze · Jira · Jira Product Discovery · Miro · Adobe Suite · Hotjar · BigQuery

AI & automation: AI-assisted prototyping · Claude (custom skills for product process and release comms) · AI chat and conversation design · Figma AI · prompt design

Methods: Double Diamond · MECLABS · Baymard · Gestalt · 5-phase product process · Agile / Scrum

EDUCATION

Academy Xi, UX/UI Transform · *2021*
University of New South Wales, Bachelor of Social Work and Psychology · *2014*
Careers Australia, Diploma of Human Resource Management · *2015*

AWARDS & COMMUNITY

- **Miro, Balanced Scorecard Winner** for achieving the highest metrics.
- **ADPList, Rising Star**, one of the highest-contributing mentors of the month; active mentor and mentee since 2023.
- **MYOB, The MYOB Way Award**, employee of the month for living the company values.
